MARINA HIGH SCHOOL

Planning for a new field, stadium begins

The Marina High football team during a recent practice. The Mariners will open the season with a scrimmage against Pacific Grove High and a game at San Jose High.

By Molly Gibbs mgibbs@montereyherald.com

The Monterey Peninsula Unified School District took the first step forward in creating a home field for Marina High School sports at Tuesday's board meeting.

The board approved an agreement with Weston Miles Architects for design services for the creation of a multi-use field and stadium project, at a cost not to exceed \$736,650 of the Measure I school bond

"Marina is one of the few high schools in all of Mon-

a field to play home football vember 2019. games or home soccer games, the district's superintendent, PK Diffenbaugh, explained. "So the community has really been looking forward to that because I think, in some ways, it's a culmination of a lot of the hard work that the community has put in to really turn the school into a full, comprehen-

sive high school." After years of Marina High indoor sports teams using Los Arboles Middle School, Seaside High and the Water City roller rink, with practices outside on the blacktop not being out of the question, the school terey County that doesn't have unveiled its new gym in No-

Currently, Marina High's outdoor sports teams play at various locations around the Peninsula. The football team plays at Monterey Peninsula College, while the softball team plays at Los Arboles Middle and the school's soccer teams alternate between Seaside High and Marina's fields.

The money for the project comes from a \$213 million facilities bond passed by voters in 2018. Measure I provides funds for repairing and updating school facilities, including athletic facilities, stadiums and fields.

In addition to Marina High's

gym, recently completed projects include Seaside High's renovated stadium and track, which was completed in 2020.

Some of the Measure I funds are also set to be used to complete the controversial renovation of Monterey High School's Dan Albert Stadium.

The estimated \$12 million project - which includes a lower softball and multi-use field, a multi-purpose weight room, added visitor bleachers, a new press box, improved accessible seating and safety features and permanent lighting has an area of contention

LEGISLATURE

Lawmakers OK budget; taxpayers to get refund

By Adam Beam The Associated Press

SACRAMENTO » California lawmakers on Wednesday approved a nearly \$308 billion spending plan that includes money to cover abortions for women who can't afford them and the health care costs for low-income adults living in the country illegally while sending cash payments to most taxpayers to help offset record-high gas prices.

The operating budget now heads to Gov. Gavin Newsom's desk, who could sign it by the end of the week before lawmakers leave town for their summer recess.

The budget continues a remarkable turnaround for the nation's most populous state, which just two years ago raised taxes and slashed spending to cover what they feared would be a staggering \$54.3 billion budget deficit caused by the pandemic.

RICH PEDRONCELLI — THE ASSOCIATED PRESS

Members of the California Assembly meet at the Capitol in Sacramento on Monday.

soared on the back of a roaring stock market that boosted the wealth of the state's disproportionate share of millionaires and billionaires who pay higher tax rates than other states. The top

Instead, California's revenues 1% of California earners account for roughly half of all the state's

income tax collections. The result: A \$97 billion budget surplus, the largest in state

"Thanks to California voters

who gave California a progressive tax system that ensures the wealthiest among us pay their faire share, this historic budget truly puts California's wealth to work for all," said state Sen. Nancy Skinner, a Democrat from Berkeley and chair of the Senate Budget and Fiscal Review Committee.

Republicans bemoaned the size of the state budget and slammed Democrats and the governor for not suspending the state's tax on gasoline — which will increase to 53.9 cents per gallon on Friday to accompany the state's average gas price of \$6.30 per gallon, the highest in the nation.

Republicans attempted to amend the budget on Wednesday to suspend that gas tax, but Democrats rejected it.

"You're basically telling California motorists to take a hike. You're telling everyone struggling to put food on the table

CALIFORNIA

Concealed gun permit applicants

By Jason Green

Bay Area News Group

SACRAMENTO » The personal information of California residents who received or were denied concealed carry weapons permits between 2011 and 2021 was mistakenly exposed this week, according to the California Attorney General's Office.

The data exposure, which could potentially involve hundreds of thousands of gun owners, occurred during an update to the state Department of Justice's 2022 Firearms Dashboard Portal, the office said in a statement Wednesday. The information included names, birthdates, addresses, driver's license numbers and criminal histories, the agency said, but added that Social Security numbers and financial information were not disclosed.

In a statement posted to social media, the Monterey County Sheriff's Office said it does not have a list of local residents whose data was leaked.

"I am very concerned about this data breach and the risk it poses to Monterey County and California's CCW permit holders," Sheriff Steve Bernal said in the post.

Five other state-operated databases were also affected. They included the Assault Weapon Registry, Firearm Safety Certificate and Domestic Violence Restraining Order dashboards.

This unauthorized release of personal information is unacceptable and falls far short of my expectations for this department,' Attorney General Rob Bonta said in a statement.

The office said the DOJ was "investigating the extent to which any personally identifiable information could have been exposed from those dashboards and will report additional information as soon as confirmed.

After making the updates on Monday afternoon, the DOJ learned that the personal information was accessible in a spreadsheet on the portal, according to the office. The DOJ said it took steps to remove the information from public view and shut down the dashboard Tuesday morning. The office said the dashboard and data were openly available for 'less than 24 hours.'

The office did not immediately respond to a message seeking an estimate of the number of people affected by the data exposure. The Associated Press reported that the breakdown could involve as many as hundreds of thousands of gun owners who applied for CCW permits.

Roughly 40,000 CCW permits were issued last year, down from more than 100,000 during the peak year of 2016, according to the DOJ's website.

Personal information from the errant disclosure may have been posted on social media websites, the Fresno County Sheriff's Office said in a statement Tuesday afternoon. The sheriff's office said it learned about the vulnerability from the California State Sheriffs' Association.

The California Rifle and Pistol Association noted that the data exposure came days after the U.S. Supreme Court threw out New York's requirement that those

LEGISLATURE

State advances bid to create drug injection sites

By Don Thompson The Associated Press

SACRAMENTO » The California state Assembly on Thursday approved a controversial bill allowing Los Angeles, Oakland and San Francisco to set up places where opioid users could legally inject drugs in supervised settings

The move follows more than a year of legislative consideration, with proponents saying it would save lives and detractors saving it would enable drug addic-

The Assembly's approval sends the bill back to the state Senate for final con-

sideration in August, after dose prevention sites in the lawmakers return from a United States, intervening monthlong summer recess. Senators approved a slightly different version more than a year ago, with no votes to spare.

The idea is to give people who would use drugs anyway a location to inject them while trained staff are available to help if they suffer accidental overdoses.

The move comes amid a national opioid crisis and spike in overdose deaths particularly if users inadvertently ingest drugs spiked with fentanyl.

New York City in December opened the first two

in more than 150 overdoses, although its operation does not have federal approval to operate. Rhode Island approved testing such centers for two years.

The U.S. Justice Department under the Biden administration recently signaled it might be open to allowing the sites with "appropriate guardrails," a turnaround from the Trump administration that won a lawsuit blocking a safe consumption site in Philadel-

The measure passed the Assembly on a 42-28 vote, publicly recognized over- one more vote than needed.

But it had bipartisan opposition amid a sometimes personal debate. Two members, Carlos Villapudua and Freddie Rodriguez, disclosed that their brothers had each died of complications from drug abuse, and they were among Democrats who spoke against the proposal.

"This is not the one thing that is going to stop the fentanyl or opioid epidemic in our state, but it will help. It will help, and it will save lives," said Democratic Assemblyman Matt Haney, a former San Francisco supervisor who represented the troubled Tenderloin neighborhood and carried the bill

to the field.

except for five nights a same lights that were used year when athletic events in Seaside's stadium and track renovation. Diffenbaugh said the response from Seaside's community has been overwhelmingly The stadium lights positive, because the "focus we're really somewhat at lated practices and games that lie at the heart of light" design of the stadium the community has been the board before it opens

Diffenbaugh explained that limited facilities and field access require stadium lighting in order to ensure that all school sports will be able to practice and play into the evening. Next year's later school start and end times will also affect sports and after-school activities. In compliance with Senate Bill 328, high schools will not be able to start before 8:30 a.m., which will push back afternoon and evening activities.

Despite the ongoing battle over Monterey High's stadium renovation, Diffenbaugh is optimistic about Marina High's field and stadium project. He said the situation is different from Monterey's because

trict is prepared to use its experience to be better prepared for Marina's project. "We don't anticipate any

major concerns because this has been something that the community has wanted and asked for, but we will certainly be proactive," Diffenbaugh explained. "We certainly will engage the community, ensure that they understand the mitigations that we put in place to address any concerns that might arise, and that'll be our path forward.

Diffenbaugh said that the district hopes to complete the initial planning process with the architectural firm by late spring or early summer of 2023. After that, the project will need to be approved by
